

BULL RIDING ISN'T FUN FOR EVERYONE

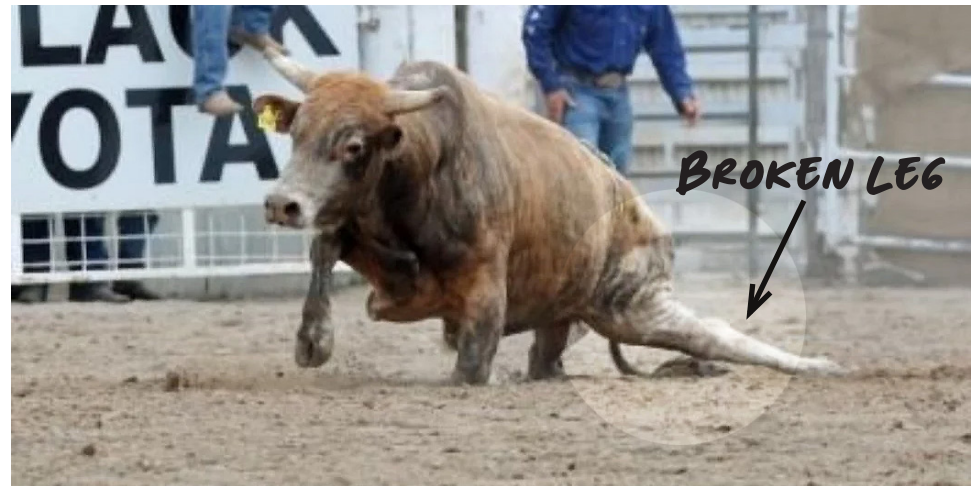

**ANIMALS FEEL PAIN,
JUST LIKE WE DO**

JUST BECAUSE THEY'RE BIG...

...doesn't mean they
can't get hurt.

People who care about
animals don't put them
at risk of injury or death.

“Bucking straps and spurs can cause the bull to buck beyond his normal capacity, and **his legs or back** may thus **be broken.**”

— Peggy Larson, veterinarian and
former rodeo performer

Bull riding is **not a sport**. It's a **cruel business** where profit comes before the well-being of helpless animals.
Next year, please don't buy a ticket!
