JOIN *the* TURTLE BRIGADE

Turtles look tough, but they are in trouble! New Hampshire has 7 species of turtles and 4 are considered in greatest need of conservation. Worldwide, 50% of modern turtles are either threatened or extinct.

Ways to help turtles:

- Watch for turtles crossing the road and assist them if necessary
- Support conservation efforts.
- Don't disturb nesting turtles
- Watch dogs around wetlands
- Learn your turtles and report sightings to **RAARP@wildlife.nh.gov**
- Contact NHARL to help us help turtles

Every turtle is a miracle! Eggs and young turtles are food for many other animals. A turtle that beats the odds and makes it to adulthood can take up to 20 years to reproduce.
